

Introduction

This document provides users with essential tasks associated with Wordfast Pro (WFP) and assumes you are already familiar with the interface and basic software functions. Use the online help for more details.

Save a file

As you work on a file, frequently save your changes to a local folder.

To save a file:

Save

1. Click the **File** tab, if you are not already on it, and then click the **Save File as Translated**, **Save** or **Save As** button.

File	Edit Form	atting Transla	tion Termino	ology Review				
Close	Recalculate	Get MS Word	Open Source	Switch Editor	Preview	Save File As	P Save	Bave As
	Progress	Table	File	Layout		Translated		

Save File As Translated Select to save the translated file to a local folder.

Select to save the .TXLF file to a local folder with the existing file name.

Save As Select to save the .TXLF file to a local folder under a different name.

A progress bar is displayed. After successful completion, the file is updated in a local folder.

2. (Optional) Continue with your translation or review. When you have finished, it is time to complete the file.

Chain files

To combine multiple files and view them as a single file, use **Chain Files**. For example, if you are translating or reviewing ten files with ten segments each, you can temporarily chain them into a single file of 100 segments. Chaining files is particularly useful when working with duplicate or similar content among files.

You cannot export or save chained files as a single TXLF file.

This documentation is proprietary and is protected by U.S. and international copyright laws and trade secret laws. Copyright [©] 2024 Translations.com, Inc. ("Translations.com") All rights reserved. You can open and work on a single chained file or multiple sets of chained files in the **TXLF Editor** view. Each chained file displays on its own tab.

To chain files:

1. In the Current Project view, on the Project Files tab, select a set of files, then click Chain Files.

The chained file opens in the TXLF Editor.

To determine the related file name for a segment, hover over the segment ID.

Chained-Sample-Document-2-MSWORD_TXLF-fr-FR#TR_VBWN#.docx.txff X									
Sou	Source or Target Match Case Regex Enter text to filter segment								
ID	English (United States)								
21	For example, there is an image of the web accessibility symbol to the left of this paragraph.								
22	Its alternate text is "Web Access Symbol".								
23	Alt text should communicate what an image means, not how it looks.								
1	TRANSLATION MANAGEMENT.

3	S LivePreview.Upload_1-MSWORD_TXLF-fr-FR#TR_VBWP#.docx								
4	INTEGRATE WITH MANY SYSTEMS								
5	WORK WITH MULTIPLE VENDORS								
6	QUICK PROCESSING TIME								

2. Click a segment to make it the active segment.

The file name changes from the chained name to the source file name of the active segment.

Ch	Chained-LivePreview.Upload_1-MSWORD_TXLF-fr-FR#TR_VBWP#.docx.txlf ×

4 5 6	INTEGRATE WITH MANY SYSTEMS WORK WITH MULTIPLE VENDORS QUICK PROCESSING TIME							

3. From the File tab, click Save.

The segments are saved in the chained file and restored to their original files without the chained format. The progress for each individual file will show on the Progress tab.

Translate a file

To translate a file:

1. On the Project Files tab, select a file, then click Translate File or double-click the file name to open it.

2. Select a target segment and enter the translation. If you have a translation memory (TM) added to the project, you can leverage translations from it.

*QRG-En-FrCa.xisx ×							
S	ource or Target 🔹 🗌 Match C	Filter: S	elect sr 👻	Q	>		
ID	English (United States)	French (Canada)	Score	Status			
3	TransStudio Online	pour TransStudio Online 5	97%		1	^	
4	Introduction	Introduction	100%		~		
5	This document provides users with essential tasks associated with TransStudio Online (TSO) and assumes you are already familiar with the interface and basic software functions.	Ce document présente aux utilisateurs les tâches essentielles associées à TransStudio Online (TSO) et suppose que vous connaissez déià l'interface et les fonctions de base du logiciel.			~	~	

3. Once you are satisfied with the translation, click **Next Segment** or **Alt + Down Arrow**. This action updates the TM and moves to the next target segment. The segment state changes to Translated. Segments that are changed to Translated are calculated on the Progress Bar at the bottom of the window.

Segments: 24/33 | Segment (Src/Tgt/Max): 11/28/- | Paragraph (Src/Tgt/Max): 29/28/- 69% Translated (57 words left)

As you translate, you can also commit the active segment to the TM by selecting the Next Needs Translation Segment shortcut key (**CTRL + Enter**), and the segment state will change to Translated and then moves to the next segment whose status is set to **Needs Translation**.

Copy all tags

Use **Preferences > General Preferences > Tags** to configure tags as full-sized or shortened.

To copy all tags:

1. In the **TXLF Editor** view, open a file.

2. On the Edit tab, click Copy All Tags.

All copied tags display at the location of the cursor. Reorder them to mimic the source content order using the drag-and-drop or copy-and-paste technique.

File	Edit	Formatting	Translation	Terminology	Review
4	₽	-			•
Undo	Redo	Find / Replace	Copy All Tags	Clear All Tags	Show Whitespace Characters

3. Select **Segment** or **Document** from the drop-down menu.

Segment or **Alt+A** Select to copy only the tags for the selected segment to the target.

Document or **Alt-Shift+P** Select to copy all tags for the entire document.

All tags are copied to the segment or document.

Find and replace content

Use Find/Replace to search for and replace text in translated content.

To find and replace content in a file:

- 1. In the **TXLF Editor** view, click the **Edit** tab.
- 2. Click Find/Replace.

3. On the **Find/Replace** dialog, click in the **Find what** field, then enter your search text or select it from the dropdown list.

4. (Optional) Click the **Expand** icon [≫] to expand the panel for additional options, or click the **Collapse** icon [∧] to collapse the additional options.

- 5. Click **Find Next** to move through all instances of the content.
- 6. (Optional) Click **Reading Highlight** and select the **Highlight All** action from the drop-down list to highlight all instances of the content in all open files. Click **Clear Highlighting** to remove the highlighting from the previous search.

Find/Repl	ace			×
C Find v	vhat:	translation		Ŧ
 Direction Ba Fo 	ckward	Reading Highlight Highlight All Clear Highlighting Whole Words Only Ignore NBSP Use Regex	 Find Next Search Source Search Target Search Open File 	Close

(Optional) You can filter table segments using the **Segments with find/replace highlight all** table filter to see all segments containing text highlighted by **Highlight All**.

- 7. (Optional) To replace regular expressions, wild card characters, or words, click the **Replace** icon **S**. For additional options, click the down arrow on the sidebar.
- 8. Click in the **Replace with** field and enter the replacement text.

Fin	Find/Replace

Replace Replace All Find Next Close						
	Direction	Options				
	 Backward 	✓ Ignore Case ✓ Search Source				
	Forward	🗌 Whole Words Only 🗹 Search Target				
		☐ Ignore NBSP ✓ Search Open File	es			
		Use Regex				

9. (Optional) Select the direction of the search and any other options.

10. (Optional) Click one of the following actions: Replace, Replace All, Find Next, or Close.

The content you found has been replaced with the new content.

Transcheck

You can use Transcheck to scan translated content for non-linguistic errors such as missing tags, empty targets, numbers, and terminology within target segments.

Is displayed in the Status column for segments with errors.

To enable Transcheck and customize Transcheck options, configure in **Preferences > Current Project Preferences > Transcheck**.

Use transcheck

After you have configured Transcheck options, you can begin using Transcheck when you translate or review a segment and commit it to the TM. You can also use the Transcheck configuration option **Transcheck segments** while translating to check for errors during the translation process.

To use Transcheck during translation:

- 1. In the TXLF Editor view, select a segment and complete your translation of that segment.
- Select Next Segment or press Alt+Down Arrow to update the TM, move down one segment, and leverage the next segment from the TM.
- 3. (Optional) If Transcheck identifies an error in the segment, it posts a warning message. Choose one of the following actions:
 - Select Go back to fix issue to correct the error.
 - Select **Continue** to continue translating without changes.

If you choose to correct the error, the **Error Status** icon **U** is removed from the **Status** column and from the **Transcheck** tab.

If you do not correct the error, the Error Status icon ^{III} remains in the Status column and on the Transcheck tab.

Use Transcheck All

Use **Transcheck All** to scan all segments of a file for non-linguistic errors in the target segments and issue warnings for missing and incorrect text. Configure and enable your Transcheck preferences under **Preferences > Current Project Preferences > Transcheck**.

Do not use **Transcheck All** if you want Source and Target Consistency checks. Instead, use Transcheck Report from the Project Files tab on the **Current Project** view.

To use Transcheck All:

- 1. In the **TXLF Editor** view, finish translation of all segments in a file.
- 2. Click the Review tab, then click Transcheck All.

File	Edit	Formatting	Translation	Terminology	Review			
c	abc	abc		B				**
Spellcl	heck File	Mark Spelling Errors	Add Note	Edit Note	Delete Note	Export Notes	Transcheck Segment	Transcheck All

In **General Preferences** under **Warnings**, if **Transcheck All Warnings** is selected a **Transcheck All Warning** pop-up dialog appears. The "Do not warn me about this anymore" checkbox will turn off this pop-up dialog. The Use Transcheck Report From Current Project view link will open the **Project Transcheck** dialog.

3. Click Continue.

A Transcheck report and summary results.

4. (Optional) On the Transcheck Report, determine the terminology errors you want Transcheck to ignore from highlighted terms in the **Terminology Check** report section.

To best optimize the Transcheck Report, you can configure Transcheck to ignore highlighted terms you identify under conditions you specify. The terms and conditions you select are in the **Ignored Terminology Errors** section of the report.

Report is optimized for Google Chrome, some features might not work well in your current browser. Project TransCheck Report Report Summary (1 files)

10. (Optional) After closing the Transcheck report, select any remaining segments with the Error Status icon II in the Status column.

11. (Optional) Click the Transcheck tab to examine the details of the segment error.

The total number of errors in the segment is the number in parentheses on the Transcheck tab.

TM L	ookup Notes Segme	nt History Metadata	Transcheck (3)		
Prev	Previous error Next error Refresh Ignore warning				
#	Warning	Explanation	Cause		
1	Tag Check	Source contains formatting missing the target.	g in Source contains "1, 2, 3" which is missing in target.		
2	Unedited Fuzzy Check	Target contains a fuzzy match that h not been modified			
3	Untranslated Text Check	Source text is not translated in the target.	"in" should be translated in target.		

- 12. (Optional) Click **Next error** or **Previous error** on the **Transcheck** tab to view the next or prior segment error.
- 13. Choose one of the following actions:
 - Correct the error and click **Refresh** to complete the correction.
 - Click **Ignore warning** to continue reviewing error warnings without making any changes.

If you correct the error, the Error Status icon 🕕 is removed from the Status column.

If you do not correct the error, the Error Status icon 🕕 remains in the Status column.
