

WORDFAST

WORDFAST CLASSIC

The #1 MS Word-based
translation memory tool

Wordfast Classic is a desktop TM tool that integrates with Microsoft Word, allowing you to store your translated content for reuse on future projects. Ranked the #1 TM tool for translators working with MS Word, Wordfast Classic is designed to drive power to the desktop of the individual translator, maximizing efficiency, improving overall consistency and reducing costs. Because Wordfast Classic runs inside of MS Word, it offers an interface that is quick to learn and easy to use.

BENEFITS

COMPATIBILITY

Wordfast Classic integrates with installed versions of Microsoft Word for Windows or Mac. It can also be run on Linux using a Windows emulator. Wordfast Classic also supports TMs in TMX format, making it compatible with most major commercial CAT tools. This allows for easy collaboration with colleagues and seamless integration with any customer's workflow.

INTUITIVE INTERFACE

Because Wordfast Classic operates entirely within Microsoft Word, there is no need to install or run any additional applications or extensions. The interface comes naturally to most translators, enabling them to be up and running in just a few hours. Users also benefit from the many features and shortcuts already available in Microsoft Word. The result is a user-friendly TM system that can be adopted quickly.

INCREASED PRODUCTIVITY

Wordfast Classic is designed to speed up the translation process thanks to powerful features such as AutoSuggest, Automatic Number Localization and Advanced Glossary Term Recognition.

WORDFAST

IMPROVED QUALITY AND CONSISTENCY

Wordfast Classic stores every sentence you translate and retrieves it automatically so you never have to translate the same thing twice. This guarantees maximum consistency across all translated content. Wordfast Classic also features real-time QA, which ensures accuracy of certain translated elements and warns about potential errors as you type.

CUSTOMIZABLE FEATURES

User-defined macros allow you to customize Wordfast Classic's feature set to meet your specific project needs.

INTEGRATION WITH EXTERNAL RESOURCES**

Wordfast Classic offers access to dictionaries in virtually any format and a synonym auto-suggestion feature for transcreation projects. Additionally, users can link to multiple desktop or web-based Machine Translation engines to provide MT when no match is found in your translation memory.

COLLABORATIVE POWER

Users can share TMs and glossaries in real-time over a Local Area Network. This gives translators access to the most up-to-date translated content, resulting in maximum consistency, cost savings and efficiency.

INDUSTRY-LEADING CUSTOMER SUPPORT

Independent research ranks Wordfast's support program #1 in the industry. All Wordfast licenses come with free and unlimited access to our 24/7 support hotline. Additionally, users can draw upon the knowledge and experience of their peers by participating in active online forums in dozens of languages.

RISK-FREE TRIAL

Wordfast offers a generous demo version available for download at www.wordfast.com. The demo is a full-featured version that runs without a paid license for translation memories of up to 500 translation units, making it possible to try Wordfast Classic on actual translation projects before you decide to purchase.
